*The GPIPP dataset comprises data from multiple online studies. Those studies measured the Big Five, religiosity, and demographic information with the following questionnaire (or, in a few cases, with versions of that questionnaire, which differed slightly from the version printed below).*

**As you are rating yourself, you are encouraged to rate another person. By rating someone else you will tend to receive a more accurate assessment of your own personality. Also, you will be given a personality profile for the person you rate, which will allow you to compare yourself to this person on each of five basic personality dimensions. Try to rate someone whom you know well, such as a close friend, coworker, or family member.**

**Directions: The following statements concern your perception about yourself in a variety of situations. Your task is to indicate the strength of your agreement with each statement, utilizing a scale in which 1 denotes strong disagreement, 5 denotes strong agreement, and 2, 3, and 4 represent intermediate judgments. In the boxes after each statement, click a number from 1 to 5 from the following scale:**

1. Strongly disagree
2. Disagree
3. Neither disagree nor agree
4. Agree
5. Strongly agree

**There are no "right" or "wrong" answers, so select the number that most closely reflects you on each statement. Take your time and consider each statement carefully. Once you have completed all questions click "Submit" at the bottom.**

*Questionnaire if participants did not choose another person to rate:*
